

Dear CONTAINEX customers!

„Anyone who stops being better stops being good.“ At CONTAINEX, we live up to this well-known saying every day by working with all our energy to make both our products and our company constantly better.

In order to offer you even more flexibility in the planning and use of your space solutions, we have developed the CLASSIC Line XL, which we present in the cover story. With our new standard lock box for storage containers, your belongings are now even better protected. In this issue we also present our solar module, which you can use to transform your cabin into a green and sustainable space solution. In addition to the demand for continuous development of our products, social responsibility, business ethics and sustainability are strong basic values of our corporate culture. The silver award from EcoVadis impressively confirms this effort - more about this on the back page. Did you also know that you can exchange your used space modules for new ones? Our „tip“ tells you more!

I hope you enjoy reading our news.

On behalf of the management

Günter Ringhofer

20% more space

In addition to our product portfolio, our new, three metre wide CLASSIC Line XL offers you extra space.

Our all-rounder for any purpose - the CONTAINEX CLASSIC Line – now available with a width of three metres! This not only creates an „airy“ sense of space, but also 20% more space per module. This allows us to offer you even more flexibility in the planning and use of space solutions of any size in proven CONTAINEX quality. The CLASSIC Line XL is also fully compatible with all panels and spare parts, so you do not have to make any compromises.

Competition

How wide is our new CLASSIC Line XL?

If you have read the CONTAINEX newsletter carefully, the solution is very easy. To participate in the competition, simply open the form via QR code or www.containex.com/competition and fill it in.* The first 5 respondents with the correct answer will receive a high-quality polo shirt with CONTAINEX embroidery.**

*Entry deadline is 31.12.2023

**Employees of the companies of the WALTER GROUP (incl. CONTAINEX production plants) and their relatives are excluded from participation in the competition.

Security first

Our storage containers are now equipped with lock boxes as standard.

Whether as additional storage space in your business or to store materials on the construction site our storage containers are the practical solution. We have now made our lock box even better so that your belongings are effectively protected.

The break-in protection made of robust, **6 mm thick construction steel** is welded directly on to the double wing door at the factory. With paintwork in the desired colour from the CONTAINEX RAL chart, the lock box fits seamlessly into the overall appearance. A combination with our comprehensive security fittings is also possible. This means maximum protection for your storage container!

Sophisticated security solution for your container

The lock is protected

Can be combined with security fittings

Ideal for the use in a self-storage business

Green electricity from solar power

Cost-effective and reducing CO₂

Electricity from solar power

With our new photovoltaic modules, you can transform your cabin into a cost-efficient and sustainable space solution.

Thanks to innovative technology, you can generate up to 2.55 kWp of green electricity* with our high-performance photovoltaic modules - this corresponds to the connected load of four fridges. This further reduces the CO₂ footprint of your space solution. The photovoltaic modules are compatible with all 20' portable

cabins and sanitary cabins of the CONTAINEX CLASSIC Line and CONTAINEX PLUS Line ranges and can optionally be monitored and analysed via an app. Up to 16 pieces can fit on a truck, so you save on both transport costs and CO₂.

* The customer/system operator must check the country-specific, statutory registration requirements and compliance with the regulations of the respective network operator in advance. Electrical testing and commissioning may only be carried out by authorised specialist personnel. Retrofit KIT for zero-feed operation optionally available.

Available for CONTAINEX CLASSIC and PLUS Line

Handling with crane or fork lift

Photovoltaic panels

Silver award for sustainability

CONTAINEX is one of the TOP companies audited by EcoVadis.

Social responsibility, caring for the environment and a high degree of business ethics are basic corporate values that are deeply rooted in CONTAINEX's corporate culture. Summarised under the term „Corporate Social Responsibility

– CSR“, these values are the basis for long-term professional partnerships. In order to make these values visible, CONTAINEX has been evaluated by the global CSR rating agency EcoVadis. The result is a great award for the whole team!

Our award-winning contribution to a more sustainable future

Tip

Did you know that your used containers and modules can be traded in for brand new ones?

It does not matter if it is a single module or an entire modular building: we are happy to trade in your used CONTAINEX space solutions! So turn old into new and benefit from the latest technologies (e.g insulation, fire protection), a modern look, simple processing and much more.

For more information please visit www.containex.com/buy-back.

The buyback guarantee applies to reuseable containers and cabins in the European Union, Switzerland and the United Kingdom; limited in time to a maximum of 20 years. Anything older, by separate agreement.

You can find more information and short videos about our products at www.containex.com/showpark.
